Malappuram, Kerala | anilaanu811@gmail.com | 7592859826 | | linkedIn | GitHub

## Personal Profile

---

A Post Graduate in Computer Science with specialization in Intelligent Systems from Central University of Kerala. I am passionate about data science and machine learning with strong background in solving real-world problems. I possess expertise in Machine Learning, Deep learning, Natural Language Processing and AI.

## Education

---

|                                                                                                                        |             |
|------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Central University of Kerala, MSc Computer Science</b> <ul style="list-style-type: none"><li>GPA: 8.15/10</li></ul> | 2022 – 2024 |
| <b>University of Calicut, BSc Physics</b> <ul style="list-style-type: none"><li>GPA: 8.83/10</li></ul>                 | 2019 – 2022 |
| <b>Higher Secondary Education</b> <ul style="list-style-type: none"><li>PER: 94.25/100</li></ul>                       | 2017 – 2019 |

## Projects

---

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |          |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>STOCK MARKET PREDICTION APP (DL FLASK)</b> <ul style="list-style-type: none"><li>Developed a stock market prediction app using Flask.</li><li>Integrated a pre-trained LSTM model for time-series forecasting, utilizing MinMaxScaler for data preprocessing and visualization of predictions.</li><li>Generated dynamic plots (actual vs. predicted prices, moving averages, and next 10 days forecast) using Matplotlib and embedded them into the web interface.</li></ul>                                                                                                                       | Dec 2024 |
| <b>PERSONAL VOICE ASSISTANT (NLP)</b> <ul style="list-style-type: none"><li>Built a personal voice assistant using NLP and Python libraries to perform various tasks including weather of desired city, playing songs, current time and fetching information.</li><li>Developed an intent classification pipeline using custom datasets with 128+ commands.</li><li>Integrated pyttsx3 for text-to-speech responses and nltk for Named Entity Recognition.</li><li>Enabled real-time interaction with features like continuous listening, pause/resume commands, and dynamic query handling.</li></ul> | Aug 2024 |
| <b>ENSEMBLE SNO RNA DISEASE CORRELATION PREDICTOR (ML DL)</b> <ul style="list-style-type: none"><li>Designed a machine learning pipeline using CNNs and XGBoost to predict snoRNA-disease associations.</li><li>Extracted features from similarity matrices and interaction data for enhanced prediction accuracy.</li><li>Evaluated performance with 5-fold cross-validation, achieving metrics like AUC, precision, and sensitivity.</li><li>Visualized model results using ROC and precision recall curves for interpretability.</li></ul>                                                          | Jun 2024 |

## Experience

---

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <b>AI/ML Trainer, LearnLogic AI</b> <ul style="list-style-type: none"><li>Design and deliver AI/ML training programs, including curriculum development and hands-on projects.</li><li>Develop course materials, workshops, and assessments to improve practical learning.</li><li>Guide students in implementing AI models using Python, TensorFlow, and Scikit-learn.</li><li>Stay updated with AI/ML advancements to integrate industry-relevant technologies into training.</li></ul> | Ongoing |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|

- Provide mentorship, resolve queries, and support learners in AI/ML career development.

## **Skills**

---

- Technical skills - Python (sklearn, tensorflow, nltk, numpy,pandas,YOLO), C, MATLAB, MySQL, Machine learning, Deep learning, Natural Language Processing (NLP), Flask, Streamlit, Tkinter.
- Soft Skills - Problem Solving, Decision Making, Adaptability, Fast learner, Group Working, Time Management.

## **Interests**

---

- Working on various projects and challenges.
- Experiencing real-world projects and technologies.

## **Languages**

---

- English - Proficient
- Hindi - Moderate
- Malayalam - Proficient
- Tamil - Speak
