Malappuram, Kerala | anilaanu811@gmail.com | 7592859826 | linkedIn | GitHub | Huggingface

Personal Profile

A Post Graduate in Computer Science with specialization in Intelligent Systems from Central University of Kerala. I am passionate about data science and machine learning with strong background in solving real-world problems. I possess expertise in Machine Learning, Deep learning, Natural Language Processing and AI.

Education

Central University of Kerala, MSc Computer Science GPA: 8.15/10	2022 – 2024
University of Calicut, BSc Physics GPA: 8.83/10	2019 – 2022
Higher Secondary Education PER: 94.25/100	2017 – 2019

Projects

RAG-LEGAL AND TC BASED BOT FOR INDIAN ECOMM PLATFORMS (Flipkart, Amazon, Meesho, Ajio) (LLM, RAG, FAISS) - Built a Retrieval-Augmented Generation (RAG) system using FAISS + Falcon-7B to answer questions based on legal PDFs and platform policies of Amazon, Flipkart, Meesho and Ajio. - Designed a user-facing Gradio interface deployed on Hugging Face Spaces - Enabled users to ask return/cancellation-related legal questions and get contextual answers - Used SentenceTransformers for vector embedding, chunking with LangChain, and Hugging Face Transformers for inference	Jul 2025
AI-Powered Client Status Assistant (n8n , Groq API) - Built an automated AI assistant using n8n to streamline client communication workflows by integrating Gmail and Google Calendar with OpenAI's LLM via Groq API. - Designed a daily scheduling agent that reads calendar events and unread client emails, summarizes updates, and sends dynamic HTML briefings automatically via email. - Implemented prompt engineering and cron-based triggers to automate daily execution without manual input, improving client follow-up efficiency.	Jul 2024
STOCK MARKET PREDICTION APP (DL FLASK) - Developed a stock market prediction app usinf Flask. - Integrated a pre-trained LSTM model for time-series forecasting, utilizing MinMaxScaler for data preprocessing and visualization of predictions. - Generated dynamic plots (actual vs. predicted prices, moving averages, and next 10 days forecast) using Matplotlib and embedded them into the web interface.	Dec 2024
CHILD-THERAPIST DETECTION TRACKING (COMPUTER VISION, DL) - Developed a system using YOLO Model for tracking child and therapist in video. - Performed data annotation using Labellmg software. - Used efficient YOLO v8 model for detection and tracking. - Explored Computer Vision techniques(OpenCV).	Aug 2024

Skills

- Technical skills - Python (sklearn, tensorflow, nltk, numpy,pandas,YOLO), C, MySQL, Machine learning, Deep learning, Natural Language Processing (NLP), Flask, Streamlit, Tkinter, LLM (OLLAMA), Transformers, BERT, Langchain, RAG, n8n, API.
- Soft Skills - Problem Solving, Decision Making, Adaptability, Fast learner, Group Working, Time Management.

Languages

- English - Proficient
- Hindi - Speak
- Malayalam - Proficient
- Tamil - Speak
